CONTENTS, Volume 33

Number 1, March 1987

A test of six methods for estimating true heights from stem analysis data ..... M. E. Dyer and R. L. Bailey 3

Efficient specification and solution of the even-aged rotation and thinning problem ..... *G. L. Paredes V, and J. D. Brodie* 14

Evaluation of researchers' decisions in short-rotation forestry ..... *A. S. Fege* 30

Compatible basal area and diameter distribution models for thinned loblolly pine plantations in Santa Catarina, Brazil ..... *J. P. McTague and R. L. Bailey* 43

Genetic structure of southern pine beetle populations ..... J. H. Roberds, F. P. Hain, and L. B. Nunnally 52

Plant-water relationships and growth of black walnut in a walnut-forage multi-cropping regime ..... D. Dey, M. R. Conway, H. E. Garrett, T. S. Hinckley, and G. S. Cox 70

Cost sharing in multiple use forestry: A game theoretic approach ..... D. Rideout and J. Hof 81

Chaparral conversion to increase streamflow in Arizona: sequential treatments extend duration of nitrate loss to stream water ..... *E. A. Davis* 89

Butt-log profile equations ..... *D. Bruce* 104

Evaluating the efficiency of even-aged and uneven-aged stand management ..... R. G. Haight 116

Factors limiting denitrification in soils from mature and disturbed southeastern hardwood forests ..... *E. A. Davidson and W. T. Swank* 135

Frequency sampling to predict densities in sparse populations of the Douglas-fir tussock moth ..... *R. R. Mason* 145

Estimating defoliation using stratified point intercept sampling ..... R. J. Cooper, K. M. Dodge, and R. C. Whitmore 157

An analysis of regional factor demand in the U.S. lumber industry .... *R. C. Abt* 164

Expectations and variances of basal area estimates using remeasured horizontal line sampling ..... *Y-C. Yang and C-H. Wang* 174

A world model of the demand for paper and paperboard ..... A. Baudin and L. Lundberg 185

Relating forestry investment to the characteristics of nonindustrial private forest-land owners in northern California ..... J. Romm, R. Tuazon, and C. Washburn 197

NOTES

Calibration of the hemispherical photographic technique to measure leaf area index distributions in hardwood forests .. *Y. S. Wang and D. R. Miller* 210

Combustion losses of sulfur from forest foliage and litter ..... A. R. Tiedemann 216

Variation in growth of red alder families in relation to shallow water table levels ..... *D. D. Hook, M. D. Murray, D. S. DeBell, and B. C. Wilson* 224

Approximating precision in simulation projections: An efficient alternative to Monte Carlo methods ..... *G. Gertner* 230

NOTES

Calibration of the hemispherical photographic technique to measure leaf area index distributions in hardwood forests .. *Y. S. Wang and D. R. Miller* 210

Combustion losses of sulfur from forest foliage and litter ..... A. R. Tiedemann 216

Variation in growth of red alder families in relation to shallow water table levels ..... *D. D. Hook, M. D. Murray, D. S. DeBell, and B. C. Wilson* 224

Approximating precision in simulation projections: An efficient alternative to Monte Carlo methods ..... *G. Gertner* 230

Freeze-crack-related measurements on *Plata* × *acerifolia* trees ..... D. Neeley and E. B. Himelick 239

Long-term storage of Douglas-fir pollens ..... *D. L. Copes* 244

Reviews

Photosynthesis during leaf development ..... *Reviewed by R. E. Dickson* 247

The economics of forestry and natural resources ..... *Reviewed by J. R. Vincent and C. S. Binkley* 248

Announcements 2

Forest Science Monograph 28. *PAPYRUS: A model of the North American pulp and paper industry*. By J. Keith Gilless and Joseph Buongiorno. (Mailed concurrently with this issue of *Forest Science* as a separate.)

Number 2, June 1987

Dry weight partitioning and its relationship to productivity in loblolly pine seedlings from seven sources ..... *Bruce C. Bongarten and Robert O. Teskey* 255

A model for recognizing forestwide risk in timber management scheduling ..... *Howard M. Hoganson and Dietmar W. Rose* 268

Drought tolerance of southwestern Oregon Douglas-fir ..... *Timothy L. White* 283

Comparison of constant and variable allometric ratios for estimating *Populus tremuloides* biomass ..... *Gregory A. Ruark, George L. Martin, and James G. Bockheim* 294

Response of longleaf, sand, and loblolly pines to *Pisolithus* ectomycorrhizae and fertilizer on a sandhills site in South Carolina ..... *Glyndon E. Hatchell and Donald H. Marx* 301

Reduction of *Phellinus weirii* inoculum in Douglas-fir stumps by the fumigants chloropicrin, Vorlex, or methylisothiocyanate ..... *Walter G. Theis and Earl E. Nelson* 316

Organic matter and nutrients associated with fine root turnover in a white oak stand ..... *J. D. Joslin and G. S. Henderson* 330

Decay fungi and wounding in advance grand and white fir regeneration ..... *Paul E. Aho, Gregory M. Filip, and Frances F. Lombard* 347

Competitive effects of various grasses and forbs on ponderosa pine seedlings ... *Katherine J. Elliott and Alan S. White* 356

The economic efficiency of forest taxes ..... *Villamor Gamponia and Robert Mendelsohn* 367

The economic efficiency of forest taxes: A comment ..... *W. David Klemperer* 379

Factors influencing the timber harvest intentions of nonindustrial private forest owners ..... *Robert A. Young and Michael R. Reichenbach* 381

Production and cost of scenic beauty: Examples for a ponderosa pine forest ..... *Thomas C. Brown* 394

The influence of shoot ontogeny on juvenile-mature correlations in loblolly pine ..... *Claire G. Williams* 411

Generalized error structure for forestry yield models ..... *Timothy G. Gregoire* 423

Landform-mediated differences in successional pathways among upland forest ecosystems in northwestern Lower Michigan ..... *George E. Host, Kurt S. Pregitzer, Carl W. Ramm, James B. Hart, and David T. Cleland* 445

Multiobjective programming for generating alternatives: A multiple-use planning example .... *Guillermo A. Mendoza, B. Bruce Bare, and Gene E. Campbell* 458

A new stocking guide formulation applied to eastern white pine ..... *Robert S. Seymour and David M. Smith* 469

An approach for predicting snow damage to ponderosa pine plantations ..... *Walter F. Megahan and Robert Steele* 485

Summertime radiation balances of clearcut and shelterwood slopes in southwest Oregon ..... *H. R. Holbo and S. W. Childs* 504

Analysis of the 3/2 power law of self-thinning ..... *Boris Zeide* 517

Twenty-four years of ponderosa pine growth in relation to canopy leaf areas and understory competition ..... *R. Oren, R. H. Waring, S. G. Stafford, and J. W. Barrett* 538

NOTES

Rates of free-living nitrogen fixation in some Piedmont forest types ..... *Deborah Grant and Dan Binkley* 548

The influence of Benomyl on blue stain infestation, oleoresin synthesis, and growth in paraquat-treated loblolly pine ..... *Terry R. Clason* 552

Provenance and progeny variation in pitch pine from the Atlantic Coastal Plain ..... *John E. Kuser and F. Thomas Ledig* 558

A method for estimating log grade distribution in sugar maple ..... *David D. Reed, Gary W. Lyon, and Elizabeth A. Jones* 565

Percentile-based distributions characterize forest stand tables ..... *B. E. Borders, R. A. Souter, R. L. Bailey, and K. D. Ware* 570

Early genetic evaluation of open-pollinated Douglas-fir families ..... *Kurt H. Riitters and David A. Perry* 577

Efficient unbiased tree-volume estimation ..... *Paul C. Van Deusen and Thomas B. Lynch* 583

BOOK REVIEWS

Floodplain forest ecosystem. I. Before water management measures ..... *reviewed by John D. Hodges* 591

European timber trends and prospects to the year 2000 and beyond ..... *reviewed by David J. Brooks and Richard W. Haynes* 593

Crop physiology of forest trees ..... *reviewed by F. E. Bridgwater* 595

Manuscript reviewers, 1986 596

Announcements 254

Number 3, September 1987

The quantitative description of cable yarder settings—parameters for the triangular setting with apical landing ..... *Francis E. Greulich* 603

Adjusted inclusion probabilities with 3P sampling ..... *George M. Furnival, Timothy G. Gregoire, and Lewis R. Grosenbaugh* 617

A procedure to evaluate sampling schemes for improving already calibrated models ..... *George Gertner* 632

Height and diameter growth response in loblolly pine stands following fertilization ..... *Paul V. Bolstad and H. Lee Allen* 644

Determinants of reforestation behavior among southern landowners ..... *Jack P. Royer* 654

Photosynthesis and growth response of red spruce and loblolly pine to soil-applied lead and simulated acid rain ... *John R. Seiler and David J. Paganelli* 668

Jackknife and bootstrap estimation for sampling with partial replacement ..... *H. T. Schreuder, H. G. Li, and C. T. Scott* 676

Water relations and leaf morphology of *Juniperus occidentalis* in the Northern Great Basin ..... *Richard F. Miller and Leila M. Shultz* 690

Genetic improvement effects on growth and yield of loblolly pine plantations ... . *Marilyn Buford and Harold E. Burkhart* 707

Estimation of the diameter increment function or other tree relations using angle-count samples ..... *Juha Lappi and Robert L. Bailey* 725

Predicting growth and success of coppice-regenerated oak stems ..... *K. E. Lowell, R. J. Mitchell, P. S. Johnson, H. E. Garrett, and G. S. Cox* 740

A solution procedure for the sort yard location problem in forest operations .... *John Sessions and Gonzalo Paredes* 750

NOTES

The impact value of site value taxation on the optimal time to cut timber when borrowing and lending rates diverge ..... *Thomas E. Merz* 763

Simultaneous infestation by dwarf mistletoe and western spruce budworm decreases growth of Douglas-fir in the Blue Mountains of Oregon .... *Gregory M. Filip and Catherine A. Parks* 767

Decay and dynamics of snags in the Sierra Nevada, California .... *Martin G. Raphael and Michael L. Morrison* 774

Testing a photographic method for estimating stem cross-sections .... *J. C. G. Goelz and Thomas E. Burk* 784

Fusiform rust incidence and severity in loblolly pine plantations following herbaceous weed control .... *Bruce R. Zutter, Dean H. Gjerstad, and Glenn R. Glover* 790

Ozone uptake and effects on transpiration, net photosynthesis, and dark respiration in scots pine .... *Lena Skärby, Erik Troeng, and Curt Åke Boström* 801

Dominance in a metric trait of *Pinus patula* Schiede and Deppe .... *R. D. Barnes, A. C. Matheson, L. J. Mullin, and J. Birks* 809

BOOK REVIEWS

Physiological ecology of forest production .. *reviewed by M. G. R. Cannell* 816

Properties and management of forest soils ..... *reviewed by J. E. Johnson* 817

Building models for conservation and wildlife management .... *reviewed by L. A. Maguire* 818

Number 4, December 1987

The impact of soil degradation on the expected present net worth of future timber harvests ..... *R. D. Routledge* 823

Multiattribute decision theory and forest management: A discussion and application ..... *B. T. Hyberg* 835

Age-density distributions of tall shrubs in Minnesota .... J. C. Balogh and D. F. Grigal 846

A stem dissection technique for dating branch mortality and reconstructing past crown recession ..... *D. A. Maguire and D. W. Hann* 858

Marginal productivity of public research in the softwood plywood industry: A dual approach ..... *B. J. Seldon and D. H. Newman* 872

Economic harvesting of uneven-aged northern hardwood stands under risk: A Markovian decision model ..... *I. Kaya and J. Buongiorno* 889

Fixed and equilibrium endpoint problems in uneven-aged stand management .... R. G. Haight and W. M. Getz 908

An econometric analysis of the southern softwood stumpage market: 1950–1980 ..... *D. H. Newman* 932

Estimating genetic parameters of height growth in seven-year-old coastal Douglas-fir from disconnected diallels ..... *F. C. Yeh and J. C. Heaman* 946

Optimizing species composition in uneven-aged forest stands ..... B. B. Bare and D. Opalach 958

Two-dimensional analysis of logging tail spars ..... *M. R. Pyles and E. V. Pugh* 971

Root and foliar nutrient concentrations in loblolly pine: Effects of season, site, and fertilization ..... M. B. Adams, R. G. Campbell, H. L. Allen, and C. B. Davey 984

PPS and random sampling estimation using some regression and ratio estimators for underlying linear and curvilinear models ..... H. T. Schreuder, H. G. Li, and J. W. Hazard 997

Predicting girdling probability for pine and hardwood saplings in low-intensity backfires ..... *T. A. Greene and C. L. Shilling* 1010

Estimating potential density from thinning experiments and inventory data ..... H. Sterba 1022

On the possibility of using joint cost allocation in forest management decision making ..... *J. G. Hof and R. C. Field* 1035

NOTES

In vitro responses of Conifer adventitious shoots and calli inoculated with *gremmeniella abietina* ..... *N. N. Abdul Rahman, A. M. Diner, D. D. Skilling, and D. F. Karnosky* 1047

Stein-rule estimation of timber removals by county ..... E. J. Green, C. E. Thomas, and W. E. Strawderman 1054

Comparison of volume growth calculation methods for remeasured horizontal line sampling ..... *Yong-Chi Yang and Shi-Ling Chao* 1061

Winter branch nutrients in northern conifers and hardwoods ..... O. Hendrickson 1067

Nitrogen concentrations in biomass components of white spruce seedlings in interior Alaska ..... *A. M. Gordon and K. Van Cleve* 1074

Variation in yield of blue spruce monoterpenes associated with crown position and frequency of resin canals .... *P. P. Moore and J. W. Hanover* 1081

DISCUSSION PAPER

Constraints on tree breeding: Growth tradeoffs, growth strategies, and defensive investments ..... *C. Loehle and G. Namkoong* 1089

DISCUSSION PAPER RESPONSES ..... *J. P. van Buijtenen, C. B. Talbert* 1098

BOOK REVIEWS

Forest nutrition management ..... *Reviewed by H. Lee Allen* 1105

Cell and tissue culture in forestry ..... *Reviewed by S. A. Merkle* 1106

Ecological simulation primer ..... *Reviewed by G. M. J. Mohren* 1108

Forest vegetation management for conifer production ..... *Reviewed by D. M. Smith* 1110

Soil organic matter biological and ecological effects ..... *Reviewed by R. S. Adams, Jr.* 1111
